SUMMARY

Electrical Engineering Fresh Graduate specializing in control systems, industrial automation, and IoT integration. Highly proficient in programming PLC (Omron & Siemens), designing PCB circuits, and developing microcontroller-based systems using Arduino and ESP32. Experienced in utilizing MATLAB and Proteus for system simulation and analysis. A detail-oriented team player with a proven track record in electrical troubleshooting and optimizing automated workflows.

WORK EXPERIENCE

Instrument Technician (Intern) PLN Indonesia Power - Assisted preventive maintenance and inspection of field instruments (pressure, pressure, temperature, and flow). - Supported Calibration activities under supervision of senior technicians - Observed and assisted basic PLC based control system monitoring	Jan 2026 - Jan 2026
Maintenance Electrician (Intern) PT. Solusi Bangun Indonesia Tbk - Assisted electrical maintenance on industrial equipment and electrical panels - Supported Troubleshooting of motors, wiring, and electrical components	Okt 2025 - Dec 2025
Production team Member (Intern) PT. Panasonic Manufacturing Indonesia - Assisted production line operations according to standard operating procedures (SOP) - Supported quality control and basic inspection processes	Feb 2022 - Apr 2022

EDUCATION

Electronics Engineering Politeknik Negeri Semarang	2026
Electrical Engineering SMK Negeri Nusawungu	2023

ADDITIONAL INFORMATION

- Technical Skills:** Proteus, TIA Portal, CXX Programmer, Corel Draw
- Languages:** indonesia.
- Soft Skill:** Adaptability, Critical Thinking, Analytical Thinking.
